

MOSTON DELIVERS NEW DLR COUNCIL CHAMBER & CIVIC HUB ON TIME

Moston Construction Ltd, the main contractor involved in the development of Dun Laoghaire Rathdown Council's new Chamber and Civic Hub, delivered the project within budget and on time for the official opening in June at the Town Hall in Dun Laoghaire.

The project entailed the demolition of existing internal concrete structures, construction of a steel portal frame to support Dun Laoghaire-Rathdown Council's Chambers and Civic Hub.

The existing glazed roof was removed and replaced with an efficient energy rated glazing system. Due to serious time constraints Moston crews worked relentlessly round the clock to deliver the project on time and within budget.

Working closely with the design team difficult design issues and detailing were resolved on a daily basis. It was business as usual at the Town Hall throughout the duration of the project, with minimal disruption to staff, as all demolition works were completed out of hours.

Installation of new roof glazing system from Velux.
